MecSoft Corporation, USA and Hitachi Zosen Information Systems Co., Ltd (HZS), Japan Announce Strategic Alliance

For Immediate Release
Monday, April 24, 2000

Irvine, California - MecSoft Corporation and HZS have entered into a business partnership that includes both the sales/distribution of VisualMill, MecSoft's flagship 3D manufacturing product in Japan and the inclusion of various MecSoft developed software modules in Space-E, HZS's Windows-based CAD/CAM software product. Specifically CDI Corporation (CDI), a subsidiary of Hitachi Zosen Information Systems, will have exclusive rights to sell and market VisualMill in Japan. Further, after extensive testing and evaluation of various tool path generation algorithms developed by MecSoft, HZS has decided to incorporate these into a forthcoming release of Space-E.

Mitsunobu Kuwaki President of HZS states; "A fundamental goal of HZS is to meet our customers needs as technologies rapidly change by continually adding value to our system products and services. Our partnership with MecSoft allows us to expand our CAD/CAM solution offerings and with VisualMill the means to better meet the needs of our customers".

Joe Anand, President and founder of MecSoft adds; "This announcement formalizes our relationship with HZS and CDI - a relationship that has spanned over the past two years and has involved sharing of technologies, business strategies and a mutual commitment to excellence in product performance and customer satisfaction. As a leading company for providing integrated system solutions, HZS offers new, expanded horizons for MecSoft and our products and provides a strong base for expansion in the Japanese marketplace
